

NOFAR-3

RODENTS GLUE
THICK ADHESIVE GLUE

Class :

Is a non poisonous Mouse and Rat killing glue of great efficacy and easy to use, without any danger.

PROPERTIES:

NOFAR-3: Crystal transparent glue suitable for controlling Mice and Rats as well as Lizards, Ants, Beetles, Flies, Mosquitoes, Cricket and other insects.

NOFAR-3: Thick, sticky product of high viscosity even after spreading, colourless, non-flammable, does not affect by water or moisture.

USAGE AND DOSAGE:

- Spread the glue on a piece of board cardboard, considering that this must be larger than the Mice and Rats to be captured.
- The quantity of glue to be spread must be proportioned to the size of the Mice and Rats. A 4-5 mm. Layer control any size of Rat or Mouse.
- It is not necessary to spread the product evenly, in short time this happens due to the elastic and plastic characteristics of the glue.
- Place the supports covered with glue wherever Mice and Rats move, near their dens and holes, or put the supports along the walls and put some baits as (Cheese...etc) in the middle of the support to attract the animals, it is very important to prepare and place the support in the best.
- It can be spread around plants as a defence ring.
