

TETRAMISOLE- 600

Bolus

Anthelmintic against round worms

For sheep, goats, cattle, camels

COMPOSITION: Each bolus contains:

Tetramisole HCl

600 mg

PROPERTIES:

- Tetramisole is a broad spectrum and powerful anthelmintic (imidothiazole group) against nematodes (round worms) of the gastrointestinal tract and the lung worms of ruminants.
- Tetramisole at the therapeutic dose, is safe even for the pregnant animals.
- Tetramisole exerts its anthelmintic action by paralyzing the nematodes. The paralysis is due to sustained muscle contraction which leads to neuro - muscular paralysis of the parasites.

INDICATIONS:

For the treatment and control of parasitic gastro – enteritis and verminous bronchitis, (Lung worms) caused by round worms (nematodes) in ruminants.

■ **Gastro - Intestinal Worms:**

Ascaris, Nematodiurs, Haemonchus, Ostertagia, Cooperia, Thrichuris, Chabertia, Strongyloides, Trichostrongylus, Oesophagostomum, Bunostomum.

■ **Lung worms:** Dictyocaulus.

DOSAGE: (Single dose each time)

(15 mg / kg B. wt.)

■ **Sheep, Goats, Cattle, Camels:**

One bolus / 40 kg B. wt.

■ **Lambs, Kids:** Half bolus / 20 kg B. wt.

SAFETY PERIOD:
