

AMPROLIUM – PLUS

Feed Additive Powder

COMPOSITION: Each gm contains:

Amprolium HCl	250 mg
Ethopabate	16 mg

PROPERTIES:

- Amprolim is effective against different Eimeria spp. of coccidia. It acts against the first generation of schizonts of the developing coccidia.
- Ethopabate (as a folic acid antagonist) increases the coccidiostatic effect of amprolium, hence the spectrum of activity is extended.

INDICATIONS:

For prevention and treatment of coccidiosis in broilers, growing pullets, layers, breeders, and turkeys.

DOSAGE:

- **Prevention:** 1 / 2 kg per ton of feed.
(1 kg / ton of feed in case of increased danger to exposure).
- **Treatment:** 2 kg per ton of feed for 5 days, then 1 kg / ton of feed for two weeks.

SAFETY PERIOD: For meat consumption: 3 days.

STORAGE: Keep in a dry, dark place at below 30 °C.

PACKING: (1, 5, 10, 25) KG.
