

CAMELOVIT RACING

“Feed Additive”

Highly concentrated vitamins and minerals for racing camels to exert extra power performance.

COMPOSITION: Each kg contains:

Vitamin A	1,000,000	I.U.	Choline chloride	12,000	mg
Vitamin D3	400,000	I.U.	Lysine	15,000	mg
Vitamin E	30,000	I.U.	Methionine	50,000	mg
Vitamin K3	100	mg	Ferrous sulphate	6000	mg
Vitamin B1	1000	mg	Zinc sulphate	6000	mg
Vitamin B2	1200	mg	Copper sulphate	1500	mg
Vitamin B6	600	mg	Manganese sulphate	3500	mg
Vitamin B12	2400	mcg	Cobalt chloride	100	mg
Nicotinic Acid	5000	mg	Potassium iodide	100	mg
Ca-D-pantothenate	1000	mg			
Folic acid	300	mg			
Biotin	2000	mcg			

PROPERTIES:

Camelovit supplies a good balance of vitamins A & E with Lysine which are so important to the entire cell-respiratory system, to the protein metabolism and to prevent “tying up” (Azotruia or paralytic haemoglobinuria). Also, due to the generous source of B-complex vitamins, it prevents acidosis caused by severe stress and thus speeds up recovery.

ADVANTAGES:

- Promotes better utilization of valuable proteins in the daily ration.
- Improves rebuilding of red blood corpuscles.
- Ensures peak performance when racing pressure is on.
- Speeds recovery between races.
- Has specific ability to prevent (tying up).
- Guards against pre-race flightiness.
- Contains high levels of vitamin A and E in perfect balance, thus strengthens the body.
- Decreases susceptibility to different infections.

DOSAGE: Given daily with feed.

Daily Rration	Grams / Daily
Off-spring camels	
• From birth – 2 months.	12 gm
• 2 months – weaning.	20 gm
• Weaning to yearling stage.	25-50 gm
• Yearling – 2 years.	25 gm
• Yearling over spring and early summer period	50 gm
Two years old and older camels	50 gm

• Training preparation.	50 gm
• During racing seaso.	50 gm

STORAGE: Keep in a dry, dark place at (15-25) °C.

PACKING: (500, 1000) GM.
