

GENTA-PLUS

Water Soluble Powder
For Poultry, Calves, Lambs, Kids

COMPOSITION: Each gm contains:

Gentamicin sulphate	200 mg
Doxycycline HCl	200 mg

PROPERTIES: A combination of two broad spectrum antibiotics which are effective against different Gm +ve and Gm –ve bacteria: Clamydia, Actinomyces, Rickettsia, Mycoplasma and large viruses.

- **Gentamicin**, is slowly and poorly absorbed from the intestine, hence it concentrates its antibacterial action locally in the intestine and leading to a high efficacy against the enteric infections.
- **Doxycycline**, is rapidly absorbed from the intestine and slowly excreted. It is a safe treatment even with impaired renal function.

INDICATIONS:

- For prevention and treatment of different infections of respiratory, alimentary and urogenital tracts: CRD, Coryza, Mycoplasmosis, Sinusitis, Synovitis, Colibacillosis, Fowl cholera, Salmonellosis, Spirochaetosis, Necrotic enteritis (Clostridia), enteritis, bloody diarrhea, Scours, Vibronic dysentery, etc...
- Reduction of early mortality (due to bacterial infections) in the newly hatched chicks.
- Prevention of early mortality of neonates, very young animals and weaners.

DOSAGE: (Treatment duration for 3-5 days).

- **Treatment:**
 - **Poultry:** 50 gm / 200 litres of drinking water.
 - **Calves, kids, lambs:** 1-2 gm / 20 kg B.wt. twice daily and orally with water.
- **Prevention:** Half dosage for the same period.

SAFETY PERIOD: For meat consumption: 7 days
For eggs consumption: 3 weeks.

REMARKS: Not given in cases of impaired kidneys.
Not recommended for table – eggs layers
During treatment, eggs not used for human consumption.
During treatment, minerals salts should not be added to the medicated water.

STORAGE: Keep in a dry, dark place below 30 °C.

PACKING: (100, 250, 500, 1000) GM.
