

Oral Solution Anthelmintic for sheep, goats, cattle

COMPOSITION: Each ml contains:

Levamisole HCl 15 mg Oxyclozanide 30 mg

PROPERTIES:

- Oxyclozanide removes practically all flukes (Fasciola spp.) present in the bile ducts.
- Levamisole is the racemic mixture of optical isomers o tetramisole.
 - * Levamisole removes mature and developing immature stages of wide range of nematodes, and is highly effective against the following species:
 - In the abomasum: Haemonchus, Ostertagia and Trichostrongylus spp.
 - In the intestines: Trichostrongylus, Cooperia, Nematodirus, Oesophagostomum, Chabertia and Bunostomum.
 - In the lungs: Dictyocaulus spp., including inhibited D. viviparus larvae.

INDICATIONS:

For the treatment and control of parasitic gastro-enteritis, verminous bronchitis, and liver flukes infestation.

- **Gastro-intestinal worms:** Nematodirus, Haemonchus, Ostertagia, Cooperia, Trichostrongylus, Bunostomum, Chabertia, Strongyloides, Oesophagostomum.
- **Lung worms:** Dictyocaulus spp.
- **Tape worms:** Moniezia spp.
- **Liver flukes:** Fasciola spp.

DOSAGE:

Sheep, Goats, Cattle: 5 ml per 10 kg B. wt.

(7.5 mg levamizole HCl / kg B. wt., 15 mg oxyclozanide / kg B. wt.)

SAFETY PERIOD:

- For meat consumption: 18 days.
- For milk consumption: 3 days.

REMARKS:

- Can be given to young, pregnant and lactating animals.
- Animals can be treated with organophosphorous insecticides after 14 days of the anthelmintic drenching.

STORAGE:

- Keep in a dry, dark place at below 30 °C
- Keep out of reach of children.

PACKING: (100, 250, 500, 1000) ML.
