

**Oral Solution** 

**COMPOSITION:** Each ml contains:

Colistin sulphate

2,000,000 I.U.

## **PROPERTIES**:

- Colistin (polymyxin group) is very active against Gm-ve bacteria:
- E.coli, Salmonella, Pasteurella, Pseudomonas, Shigella, Haemophilus, Klebsiella, Bordetella, etc...
  Due to its poor and slow absorption from the intestine, it concentrates its effect locally: thus it shows
- Due to its poor and slow absorption from the intestine, it concentrates its effect locally; thus it shows a remarkable effectiveness against enteric infections.
- It induces permeability changes within the bacterial cell which result in its death.

## **INDICATIONS:**

Prevention and treatment of different bacterial infections Poultry, Calves, Lambs and Rabbits such as: Colibacillosis, Salmonellosis, Pasteurellosis, Diarrhea, Enteritis, scour, etc...
