

VITAMIN – B.K. CHOLINE

**Water Soluble Powder
For Poultry**

COMPOSITION: Each kg contains:

Vitamin B1	10	gm	Folic acid	500	mg
Vitamin B2	2.5	gm	Nicotinic acid	20	gm
Vitamin B6	10	gm	Ca-D-Pantothenate	4	gm
Vitamin B12	10	mg	Choline chloride	50	gm
Vitamin K 3	10	gm			

PROPERTIES:

Choline chloride as a (Methyl-donator) and in addition to vitamin B12, increase the phospholipide metabolism in the liver, beside its lipotropic activity, facilitate the lipoprotein synthesis, and thus preventing fatty changes in the liver and by mobilizing the fat, hence preventing hepatic lipidosis (Fatty liver).

INDICATIONS:

- Cases of vitamins deficiency.
- Cases of perosis (slipped tendon).
- Fatty liver kidney syndrome.
- Stress conditions due to vaccination, debeaking, transporting, rehousing, changes of feed and weather.
- Maintains good performance and increases the production.
- Improvement of feed conversion, productivity, the growth, fertility and hatchability rates, feathering and flesh development.
- Enhancement of better rearing results.
- Helps in producing high eggs-quality, and bright strong egg-shells.
- Increase of viability and resistance against diseases.
- Effective in cases of caged-layers fatigue.

DOSAGE:

200 gm per 200 litres of drinking water for 3-5 days.

STORAGE: Keep in a dry, dark place at (15-25) °C.

PACKING: (100, 250, 500, 1000) GM.
