

TETRAZONE

Injectable Solution

COMPOSITION: Each ml contains:

Tetramisole HCl 100 mg

PROPERTIES:

- Tetramisole (L-isomer of levamisole) belongs to imidazothiazole group which has a marked anthelmintic activity against the nematode (Round Worms) infections.
- Tetramisole exerts its anthelmintic action by paralysing the nematodes.
The paralysis is due to sustained muscle contraction which leads to neuro-muscular paralysis of the parasites.

INDICATIONS: For the treatment and control of the followings:

- **Gastro-intestinal worms:** Ascaris, Nematodirus, Haemonchus, Trichostrongylus, Ostertagia, Cooperia, Trichuris, Strogylodes, Bunostomum, Oesophagostomum, Hyostrongylus.
- **Lung worms:** Dictyocaulus metastrongylus.
- **Eye parasites:** Thelazia.

DOSAGE: Single treatment by subcutaneous injection.

- **Sheep, Goats, Swine:** 0.8 ml per 10 kg B.wt.
- **Cattle, Camels:** 5-8 ml per 100 kg B.wt.
- In cases of heavy infestation, repeat treatment after one month.

SAFETY PERIOD:

For meat consumption: 7 days.

For milk consumption: one day.

REMARKS:

- Avoid treatment of debilitated or sick animals.
- Organophosphates are toxic if given within (14) days of treatment.
- Occasionally, salivation, slight diarrhea and coughing may occur in some animals

STORAGE: Keep in dry, dark place below 30 °C.

PACKING: (50, 100) ml.
