

CLOSANTEL 5%

Oral Suspension
Anthelmintic For Sheep, Cattle

COMPOSITION : Each ml contains :

Closantel 50 mg

PROPERTIES :

- A salicylanilide anthelmintic with a wide spectrum activity against several spp. And developmental stages of trematodes (adults and juvenile flukes) , flukes of the 4th stomach in ruminants, nematodes, parasitic larvae of flies and arthropods.
- Has a lasting effect , as it keeps therapeutical levels for long period .
- Due to its prolonged terminal plasma half-life, where the long persistence of activity helps prevent haemonchus infestation of sheep up to (60) days, and enhances efficacy against fasciolasis.
- Well tolerated, safe and has no adverse effect on the reproductive activity (in rams, bulls , ewes) .

INDICATIONS :

- For the treatment and control of different endo and ectoparasites attacking the ruminants .
- Trematodes (hepatic distomiasis) : liver flukes (fasciola hepatica , f.gigantica) , rumen flukes (paramphistomum) .
- Nematodes (round worms) : haemonchus, strongyloids, oesophagostomum , bunostomum , chabertia, gaigeria, cooperia, ostertagia, capillaria.
- Sheep nasal bot fly (oestrus ovis) larvae.
- Myiasis (cattle grubs – warble -) :hypoderma bovis, h.lineatum.
- Myiasis (tropical cattle grubs) : dermatobia hominis.
- Lice infestation (pediculosis) :
 - Biting lice : damalina
 - Sucking lice : linognatus , haematopinus .

DOSAGE :

- shake well before use .
- orally by drenching gun .
- (10 mg activity / kg b.wt.) .
- 2 ml / 10 kg b.wt.

SAFETY PERIOD :

- For meat consumption : 42 days .

REMARK : Not to be used in animals producing milk for human consumption

STORAGE : keep in dry , dark place below 30 °C

PACKING : (100 , 250 , 500 , 1000) ml .
