COMPOSITION: Each gm contains:

- Sulphaquinoxaline Sodium 160 mg
- Diaveridine HCL 20 mg

PROPERTIES:
- **Sulphaquinoxaline (SQS):**
  - Has anticoccidial effect and antibacterial activity against Salmonella, Pasteurella, E. coli, etc. It acts also against the second generation schizonts of coccidia.
  - It is rapidly, completely absorbed and is slowly excreted from the body.
  - Due to the slow elimination rate, it has a persistent action, which enhances its effect against coccidia.

- **Diveridine:**
  - It is a coccidiostatic agent, and has also a bacteriostatic action.
  - It forms with (SQS) a synergistic action against the different coccidia strains.

INDICATIONS:
- For prevention and treatment of caecal and intestinal coccidia, bacterial enteritis and diarrhea in poultry (chickens, turkeys), rabbits and small ruminants.
- It is also used as an aid in controlling mortality in acute fowl cholera and fowl typhoid of poultry.

DOSAGE:
- **Treatment:**
  - **Poultry:** 100 gm per 200 litres of drinking water for 3 days, followed by plain water for 2 days, then apply medicated water for the next 3 days.
  - **Rabbits:** 0.5 gm per litre of drinking water for 3–4 days.
  - **Lambs, kids, calves:** 3 gm per 10 kg B. wt. for 3–4 days.

- **Prevention:** Half dosage for the same period.

SAFETY PERIOD: For meat consumption: 7 days.

REMARKS:
- Not recommended for laying flocks and milking animals.
- Ensure adequate water intake during treatment to reduce the risk of crystalluria.
- Not given in cases of Gumboro infection, severe hepatic or renal dysfunctions.

STORAGE: Keep in a dry, dark place below 30 °C.

PACKING: (100, 250, 500, 1000) gm.
