

ELECTROLYTES

Water Soluble Powder
Oral Rehydration Therapy For Equines

COMPOSITION: Each gm contains:

Sodium chloride	96.00 mg
Potassium chloride	45.60 mg
Calcium chloride	12.30 mg
Magnesium chloride	6.85 mg

PROPERTIES:

- A balanced formula of essential electrolytes which are vital for the animal.
- Provides trace elements that animal needs during period of sickness, convalescence and stress conditions.
- Such elements make a major contribution to the body fluids and assist in maintaining normal metabolism of the body.
- Sodium chloride increases water intake and restores Na level in blood.
- Magnesium and calcium are essential elements for the body.
- Potassium reduces acidosis and insures potassium supply.

INDICATIONS:

- Since dehydration is characterized by loss of water and electrolytes together with acidosis; consequently the improper nutrient-absorption due to enteritis will quickly result in energy deficiency, which accelerates the animal's requirements for certain elements.
- For prevention and correction of dehydration and electrolytes depletion (imbalance) caused by prolonged diarrhea, haemorrhages, infectious diseases, racing, profuse sweating due to severe exercise, travelling or hot weather when animals are suffering from heat.
- A valuable supportive treatment and nutritional supplement to relieve enteric upsets of stressed animals and to compensate reduced feed-intake causing salts deficiency.

DOSAGE:

- 10 gm per 50 kg B. wt. daily, given orally with water (Follow the veterinarian instructions) until cure.

STORAGE:

Keep in a dry, dark place below 30 °C.

PACKING: (100, 250, 500, 1000) GM.
