

FERTIVAP- 2

TRACE ELEMENTS
SOLUBLE POWDER

VAPCO

Class:
Trace elements

FERTIVAP-2 a new combination of chelated trace elements that enhance the normal growth and production of the plants for long period, quick results will appear on plants with slowly absorption which leads to increase the chlorophyll and plant production.

COMPOSITION: Each kg contains:

| | |
|--------------------------------------|----------------------|
| COPPER CHELATE | 0.6% (AS Cu) |
| ZINC CHELATE | 4.0% (AS Zn) |
| MANGANESE CHELATE | 3.0% (AS Mn) |
| IRON CHELATE | 2.0% (AS Fe) |
| BORON /BORIC ACID | 1.4% (AS B) |
| MOLBEDNUM / AMONIUM MOLBEDATE | 0.05% (AS Mo) |

PROPERTIES:

FERTIVAP-2: Increases the healthy growth and production of plants for long period with quick results.

FERTIVAP-2: Prevents overcomes plant problems caused by micronutrients deficiencies.

FERTIVAP-2: Enhance chlorophyll production and fruit setting.

FERTIVAP-2: Easily absorbed by leaves in case of foliar application, and by roots in case of soil application.

USES AND APPLICATION RATE:

1- FOLIAR APPLICATION:

| CROP | RATE | NOTES |
|--|-----------------------------------|---|
| Fruit Trees (pome fruits, stone fruits, citrus and olive) | 120 gm/100 lt water | Complete trees coverage is recommended. |
| Vegetables | 120 - 180 gm /1000 m ² | Apply early in the growing season as soon as the crop has sufficient leaves to absorb the spray |

2- SOIL APPLICATION:

| CROP | RATE | NOTES |
|--|--|--|
| Fruit Trees (pome fruits, stone fruits, citrus and olive) | 175 - 500 gm/donum 50 - 100 gm / tree | Applied by fertigation Depends on age of the tree. |
| Vegetables | 250 - 350 gm /1000 m ² | Apply early in the growing season as soon as the crop has sufficient leaves to absorb the spray. |

COMPATIBILITY:

Donum = 1000 m²

Compatible with most pesticides and fertilizers, but compatibility test is recommended.
