Unique new insecticide, effective to control termites.

**COMPOSITION:** Each liter contains:

FIPRONIL 20% W/V (A.I)

**PROPERTIES:**

**FIPRIDOR-20%:** A unique new insecticide and the first in an entirely new family of insecticides called phenylpyrazole exhibiting a unique mode of action.

**FIPRIDOR-20%:** Has unique mode of action sets it a part from all other insecticides such as Carbamates, Organophosphorus and Pyrethroids.

**FIPRIDOR-20%:** Developed to control Termite.

**FIPRIDOR-20%:** Is an efficient pesticide even if used at extremely low-dose.

**FIPRIDOR-20%:** There is no any side effect on beneficial insects and soil microorganism.

**FIPRIDOR-20%:** Insoluble in water and immobile in soil, so it poses minimal risk of ground water contamination.

**USES AND APPLICATION RATE:**

Highly effective in controlling termite in pre-building constructions, constructed buildings and infected wood as follow:

<table>
<thead>
<tr>
<th>SITE</th>
<th>DILUTION RATE</th>
<th>APPLICATION RATES &amp; METHOD OF APPLICATIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre-building constructions</td>
<td>62.5-75.0 ml / 100 lt. water</td>
<td>Use 5 lt. Dilution / 1 m² for Horizontal walls or 5 lt. Dilution / 1 m vertical walls in a depth of 20-30 cm to construct the residual walls using normal spraying equipment.</td>
</tr>
<tr>
<td>Constructed buildings</td>
<td></td>
<td>Vertical and horizontal walls treated with the same dilution either by injection or by using treated constructions.</td>
</tr>
<tr>
<td>Infected woods</td>
<td></td>
<td>Treatment of infected woods by spraying with the same dilution thoroughly.</td>
</tr>
</tbody>
</table>

**RESIDUAL EFFECT:**

DT₅₀ 28 – 192 days depends on the type of soils.
( DT₅₀ : half life / time of 50% loss).
