HADAF-24%
HERBICIDE
EMULSIFIABLE CONCENTRATE

COMPOSITION: Each Liter contains:

**OXYFLUORFEN** 24% W/V (A.I)

PROPERTIES:
HADAF-24%: Selective contact herbicide, absorbed more readily by the foliage than roots with very little translocation.
HADAF-24%: Control of annual broad-leaved weeds by pre-or post-emergence application, particular crops include Onion, Garlic, Fruit trees, Grapes, Citrus and Vegetables.
HADAF-24%: The persistence of it, is related to light intensity and temperature so to obtain the longest residual efficacy, low temperature and low light intensity are required.
HADAF-24%: Has low mammalian toxicity and toxic to bees.

USES AND APPLICATION RATE:
Used to control annual broad-leaved weeds and grasses such as Nut grass, Foxtail, Rye Grass, Malvaceae, Bind Weed, Wild Oat, Brome Grass, Canary Grass, Nightshade, Wood Sorrel, Purslane, Purple Panicum, Chick Weed, Knotgrass.

<tbody>
<tr>
<td>Onion and Garlic</td>
<td>When the plant at 3-4 leaf stage until the bulb starts to form.</td>
<td>150-200 ml/donum</td>
<td>30-56 days</td>
</tr>
<tr>
<td>Garlic</td>
<td>Spraying can be done before weed appearance.</td>
<td>100-150 ml/donum</td>
<td>30-56 days</td>
</tr>
<tr>
<td>Fruit trees and Grapes.</td>
<td>Before weed emergence, use as protective spray at the end of autumn until the beginning of winter.</td>
<td>300-400 ml/donum (Use the higher rate in spring)</td>
<td>30-56 days</td>
</tr>
<tr>
<td>Citrus</td>
<td>After weed emergence.</td>
<td>400-500 ml/donum</td>
<td>30-56 days</td>
</tr>
<tr>
<td>Cabbage and Cauliflower (seedling)</td>
<td>Used on treated soil before transplanting in 1-3 days, and grow transplants at 12-15 cm height.</td>
<td>200-300 m l/donum (use the high doses to perennial weeds)</td>
<td>30-56 days</td>
</tr>
</tbody>
</table>

Donum = 1000 m²

*For more details about first aid & precautions please refer to first aid & precautions index.*
CAUTION:
- Used only on above mentioned crops and follow the recommended safety period before harvest.
- When onion is sprayed white spot may appear on the leaf but these do not affect onion growth.

GRAZING RESTRICTIONS:
Do not graze, feed or enter livestock forage cut from the area treated with HADAF-24%.

RE-ENTRY PERIOD:
24 hours after the last application.

COMPATIBILITY:
- It is preferable not to mix with other pesticides.
- The dilution of pesticide must be used during 2 hours with continuous agitation.

• For more details about first aid & precautions please refer to first aid & precautions index.
