LEVOZAN
Oral Suspension
Anthelmintic For Sheep, Goats, Cattle

COMPOSITION: Each ml contains:

<table>
<thead>
<tr>
<th>Levamisole HCL</th>
<th>30 mg</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oxyclozanide</td>
<td>60 mg</td>
</tr>
</tbody>
</table>

PROPERTIES:
- Oxyclozanide removes practically all flukes (Fasciola spp.) present in the bile ducts.
- Levamisole is the racemic mixture of optical isomers of tetramisole.
  * Levamisole removes mature and developing immature stages of wide range of nematodes, and is highly effective against the following species:
  - In the abomasum: Haemonchus, Ostertagia and Trichostrongylus spp.
  - In the intestines: Trichostrongylus, Cooperia, Nematodirus, Oesophagostomum, Chabertia and Bunostomum.
  - In the lungs: Dictyocaulus spp., including inhibited D. viviparus larvae.

INDICATIONS:
For the treatment and control of parasitic gastro-enteritis, verminous bronchitis, and liver flukes infestation.
- Gastro-intestinal worms: Nematodirus, Haemonchus, Ostertagia, Cooperia, Trichostrongylus, Bunostomum, Chabertia, Strongyloides, Oesophagostomum.
- Lung worms: Dictyocaulus spp.
- Tape worms: Moniezia spp.
- Liver flukes: Fasciola spp.

DOSAGE: Shake well before use.
Sheep, Goats, Cattle: 2.5 ml per 10 kg B. wt.
(7.5 mg levamizole HCl / kg B. wt., 15 mg oxyclozanide / kg B. wt.)

SAFETY PERIOD:
- For meat consumption: 18 days.
- For milk consumption: 3 days.

REMARKS:
- Can be given to young, pregnant and lactating animals.
- Animals can be treated with organophosphorous insecticides after 14 days of the anthelmintic drenching.

STORAGE:
- Keep in a dry, dark place below 30 °C.
- Keep out of reach of children.

PACKING: (100, 250, 500, 1000) ml.
