

NOFAR-1

RODENTICIDE
CEREAL BASE PELLETS

VAPCO

Class:
Coumarin
anticoagulant

NOFAR-1 is an anticoagulant rodenticide which has show exceptional activity against all rodent species, and can be used in all places where rodents can live.

COMPOSITION: Each kg contains:

BRODIFACOUM

0.005% W/W (A.I)

USES AND APPLICATION RATE:

- Placing the bait correctly is very important, remember that rodents are intelligent, so selection of suitable place is very important.
- Use 1 - 2 kg / donum and that depends on consumption rates.
- **Rats:** Use 100 gm of bait and put beside well-defined runs and around burrows and holes and in other sheltered places. Use bait containers as far as possible.
- **Mice:** Use about 25 gm of the bait and put around the infested areas, near the runs and burrows.
- **Rubbish tips:** Put large quantity in rubbish tips and rodent feeding places. Be sure to add new quantity when needed to prevent rodents re-spreading.

Donum = 1000 m²

GENERAL NOTES:

- To reduce wastage of bait, no more applications of the bait should be added within a period of one week.
- All remaining and uneaten baits should be handled with rubber or plastic gloves.
- Dead rodents to be handled with protective gloves and then treated with an insecticide and collected in bag for burnt.
- Treated baits should be placed at locations not accessible to children and domestic animals and it is recommended to use proof bait boxes to ensure public safety.
- Avoid mouth contact.
- Always wash hands and exposed skin after application.

*** OTHER FORMULATION: NOFAR - 0.02% TP.**
