

RAFOXIN

Oral Suspension Anthelmintic
For Sheep, Goats, Cattle

COMPOSITION : Each ml contains :

Rafoxanide 30 mg

PROPERTIES :

- A halogenated salicylanilide anthelmintic against the trematode spp. (flukes), some nematodes (round worms) and larval stages of sheep nasal bot fly.
it is extensively bound to plasma proteins and has a long terminal half – life, so it acquires a prolonged persistence in the plasma which leads to the effect against the immature flukes.
- as a proton ionophore, transporting cations across cell membranes, it acts by uncoupling oxidative phosphorylation within parasitic mitochondria resulting into its death.

INDICATIONS : for the treatment and control of the following parasitic infestations :

- **Flukes :**
 - * **Liver flukes** (mature and immature stages): fasciola hepatica, f. gigantica
 - * **Other flukes**: dicrocoelium dendriticum.
 - * **Blood sucking nematode**: haemonchus contortus.
 - * **Flies larvae**: sheep nasal bot (oestrus ovis) , lucilia .

DOSAGE:

- shake well before use.
- **sheep, goats, cattle**: 2.5 – 4 ml /10 kg b.wt.
(7.5 mg activity / kg b.wt.)
- repeat dosing after 4-6 weeks.

SAFETY PERIOD: for meat consumption: 28 days.

REMARKS:

- Not recommended for milking animals.
- Dairy animals should be treated only during their milking dry-period.

PRECAUTIONS:

- wash hands after dosing.
- avoid contact with eyes, mouth and skin.

STORAGE: keep in dry, dark place below 30 °C , away from food, drink and children.

PACKING: (100 , 250 , 500 , 1000) ml .
