TETRAMISOLE – 30
Water Soluble Powder
The Safe & Broad Spectrum Vermicidal, Larvicidal Anthelmintic For Livestock

COMPOSITION: Each gm contains:

Tetramisole HCL 300 mg

PROPERTIES:
- Tetramisole is broad spectrum and powerful anthelmintic (imidiazole group) against nematodes (round worms) of the gastrointestinal tract and the lung worms of ruminant.
- Tetramisole at the therapeutic dose is safe even for the pregnant animals.
- Tetramisole exert its anthelmintics action by paralyzing the nematode.
  The paralysis is due to sustained muscle contraction which leads to neuro–muscular paralysis of the parasites.

INDICATIONS:
For the treatment and control of parasitic gastro-enteritis and verminous bronchitis caused by round worms (Nematodes):

- **Ruminants, Rabbits:**
  - **Gastro-intestinal worms:** Ascaris, Nematodirus, Haemonchus, Ostertagia, Cooperia, Trichuris, Strongyloides.
  - **Lung worms:** Dictyocaulus.
- **Poultry:** Ascaridia, Heterakis, Capillaria, Amidostomum.

DOSAGE:
- Given with water or feed.
- Give single dose each time.
  - **Sheep, goats, cattle, camels:** 0.5 gm per 10 kg B. wt.
    (15 g active sub. / kg body wt.).
    Repeat for prevention every 4-6 months.
  - **Poultry, Pigeons:** 0.06 gm per kg B. wt.
    (20 mg active sub. / kg body wt.)
    Repeat every 3 months.
  - **Rabbits:** 0.06 gm per kg B. wt. (20 mg active sub. / kg B. wt.)
    Repeat twice per year.

SAFETY PERIOD:
- For meat and eggs consumption: 7 days.
- For milk consumption: 1 day.

REMARKS:
- Organophosphates insecticides are toxic if applied within (14) days of treatment.
- Avoid treatment of debilitated or sick animals.
- Occasionally, salivation, slight diarrhea and coughing may occur in some animals.

STORAGE: Keep in a dry, dark place below 30 °C.

PACKING: (100, 250, 500, 1000) GM.
