TRIPLE SULPHA – S

Water Dispersible Powder
For Poultry, Ruminants & Equines

COMPOSITION: Each gm contains

<table>
<thead>
<tr>
<th></th>
<th>125 mg</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sulphadimidine Na</td>
<td></td>
</tr>
<tr>
<td>Sulphadiazine Na</td>
<td></td>
</tr>
<tr>
<td>Sulphathiazole Na</td>
<td></td>
</tr>
</tbody>
</table>

PROPERTIES:
- 3-Combined valuable sulpho components, with a high antibacterial activity against Gm +ve and Gm –ve bacteria: Coli, Staph, Strept, Salmonella, Pasteurella, Proteus, Chamydia etc..
- Also effective against Eimeria spp. (Coccidia).
- Sulphonamides diffuse very widely into tissues and thus exert effectiveness against the bacterial infections.
- Sulphonamides are well tolerated and have low toxicity, hence they are safe to be used.

INDICATIONS:
- **Poultry**: Coryza, Caecal coccidiosis.
- **Ruminants**: Pneumonia, Enteritis, Scour, Foot rot, Haemorrhagic septicaemia (Pasteurella)
- **Equines**: Pneumonia, Strangles, Enteritis, Diarrhea.

DOSAGE:
Mix well before use.

- **Treatment**: Duration for 3-5 days.
  - **TRIPLE SULPHA - S**
    |                          | 500 gm per 200 litres of drinking water |
    | Poultry                  |                                    |
    | Ruminants, Equines       | 20-30 gm per 50 kg B. wt. daily and orally with water |

- **PREVENTION**: Half dosage for 3 days.

SAFETY PERIOD:
- For meat consumption: 7 days.
- For milk consumption: 4 days.

REMARKS:
- Not recommended for young stocks and layers.
- Ensure adequate water intake during treatment to reduce the risk of crystalluria.

STORAGE: Keep in a dry, dark place below 30 °C.

PACKING: (100, 250, 500, 1000) GM.
