

VAPCOTRIM BOLUS

(Bolus)

COMPOSITION: Each Bolus contains:

Trimethoprim	200 mg
Sulfadiazine	1000 mg

INDICATIONS:

- For treatment of bacterial scours, acute salmonellosis and bacterial pneumonia.
- is effective against most common Gram- positive and Gram-negative bacteria including Escherichia coli, Klebsiella spp, Pasteurella spp, Salmonella spp, and Staphylococcus spp.

DOSAGE:

- **Calves, Lambs, Kids, Foals, Pigs:** orally 1 bolus per 40 kg B.wt (30 mg activity /kg B.wt) daily until two days after the symptoms are resolved.
- (in cases of salmonellosis and bacterial pneumonia treatment should be continued for five consecutive days).

WITHDRAWAL PERIOD:

Calves, lambs, kids, pigs: for meat consumption 15 days after the last treatment.

WARNINGS AND REMARKS:

- Treatment must not be continued for more than five days.
- should not be used in animals with a functionally mature rumen.
- wear protective gloves during handling the product.
- Do not use this product if the animal has allergy to Sulphonamides.
- Wash hands and exposed skin after use.
- Flumequine should not be associated with Trimethoprim – Sulphonamide treatment.
- Adequate water intake must be available to avoid Sulphonamide precipitation.

STORAGE:

Keep in dry dark place below 30 °C.

PACKING: 50 boluses.
