VERMIZOLE – 300
Albendazole Bolus
Anthelmintic For Sheep, Goats, Cattle, Camels

COMPOSITION: Each bolus contains:
Albendazole 300 mg

PROPERTIES:
- Albendazole is a benzimidazole anthelmintic which is active against most nematodes, trematodes and some cestodes.
- Albendazole is characterized as being effective against adult and larval stages of gastro-intestinal roundworms, lungworms, tapeworms and liver flukes.

INDICATIONS:
For treatment and control of round worms, tape worms, and liver flakes infestations, in sheep, goats, cattle and camels as follows:
- **Stomach round worms:** Ostertagia, Trichostrongylus, Haemonchus.
- **Intestinal round worms:** Strongyloides, Cooperia, Nematodirus, Bunostomum, Trichostrongylus, Oesophagostomum, Marshallagia, Chabertia.
- **Lung worms:** Dietyocaulus, Protostrongylus, Mullerius.
- **Tape worms:** Moniezia, Avitellina.
- **Liver flukes:** Fasciola, Dicrocelium.

DOSAGE: (Single dose)
- **Sheep and Goats:**
  - Lung, Round, Tape worms:
    Half bolus / 40 kg B. wt. (3.8 mg activity / kg B.wt.).
  - Lung worms, Chronic Fasciolasis (F. hepatica):
    One bolus / 40 kg B. wt. (7.5 mg activity / kg B.wt.).
  - Fasciolasis (Dicrocaulium):
    Two boluses / 40 kg B. wt. (15 mg activity / kg B.wt.)
- **Cattle, Camels:**
  - Lung, Round, Tape worms:
    One bolus / 40 kg B. wt. (7.5 mg activity / kg B.wt.).
  - Liver fluke (Chronic Fasciolasis):
    One boluse / 30 kg B. wt. (10 mg activity / kg B.wt.)
  - Acute Fasciolasis:
    Two boluses / 40 kg B.wt. (15 mg activity / kg B.wt.)

SAFETY PERIOD:
For meat consumption: * Cattle, camels: 15 days.
* Sheep, goats: 10 days.

For milk consumption: 5 days.

REMARKS:
- Don’t overdose.
- Don’t treat animals during first month of pregnancy.

STORAGE: Keep in a dry, dark place below 30 °C.

PACKING: 50 Boluses.
