CYPOTHHRIN-25%
INSECTICIDE
EMULSIFIABLE CONCENTRATE

A pyrethroidal insecticide effective against wide range of insect pests attacking agricultural crops.

COMPOSITION: Each litre contains:

CYPERMETHRIN 25% W/V (A.I)

PROPERTIES:
CYPOTHHRIN-25%: A pyrethroidal insecticide, moderately toxic to human and animals.
CYPOTHHRIN-25%: Extremely active against cutworms, leafhoppers, flea beetles, cucumber beetles, aphid, whiteflies, armyworms, loopers, thrips on broccoli, cauliflower, cabbage, lettuce, garlic, leeks, and onion.
CYPOTHHRIN-25%: Non phytotoxic when used as recommended.

USES AND APPLICATION RATE:

<table>

CAUTION:
- Used only on above mentioned crops and follow the recommended safety period before harvest.
- Lower rate of CYPOTHHRIN-25% should be used under light and moderate insect pressure.
- Higher rates of CYPOTHHRIN-25% should be used to control heavy to extremely heavy insect populations.

• For more details about first aid & precautions please refer to first aid & precautions index.
**PHYTOTOXICITY:**
Not phytotoxic when used as recommended.

**RE-ENTRY PERIOD:**
48 hours from the last spraying.

**COMPATIBILITY:**
Compatible with most pesticides, but it’s preferable to make compatible test before mix.

- For more details about first aid & precautions please refer to first aid & precautions index.
